

## Blizzard White Booth Coating

Restore your spray booth to a 'like new' condition in as little as two hours.

- Water-based coating sprays on fast with little or no preparation.
- Gloss white for optimum reflection: won't fade or turn yellow.
- Superior film-build and durability makes removal fast and easy, even up to 500 bake cycles.
- Can be recoated between maintenance cycles so your booth's lighting is always bright.
- Ready to apply by spray gun (3.0).

### Ordering information

#467991 3.8 L (1 gal)  
#467995 18.9 L (5 gal)

## Ice Transparent Booth Coating

Protect booth lights and windows quickly and easily.

- Spray-on water-based coating dries clear: won't distort clarity of booth lighting or windows.
- Simply peel and reapply to maintain clean lights and windows.
- Ready to apply by spray gun (3.0).

**Transparent four-layered film protects your spray booth walls for 1 year!**

# Film4Booth

Self-Adhesive: easy to apply and remove on booth walls, lights and windows to keep your booth in like-new condition. Does not leave adhesive residue.

Four easily removable layers each last months, for one-year of protection.

Each transparent ant-static polypropylene layer is treated with paint adhesion to trap overspray.

Protect your investment and reduce maintenance costs.
